It is noted that applicant incorrectly numbered Claims 21-24. Accordingly, the examiner has renumbered claims 21-24 as 22-25 respectively to comply with section 608.01 (j) of the MPEP and henceforth the claims will be referred to only as renumbered.

This applicant contains a Multiple Dependent Claim for which the fee has not been paid. The Multiple Dependent Claim Fee has been charged to Deposit Account 19-3935 as agreed by Mr. Mark J. Henry in a telephone conversation on November 4, 1998.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

On page 1, the following has been inserted before the heading "BACKGROUND OF THE

aut. INVENTION", - This application is a Continuation of application 08/340,376, ^{Filed Nov. 14, 1994} now abandoned. -

In claim 23:

Line 1, "21" has been replaced with --22--.

30 21

Art Unit: 2854

The change serves to correctly identify the parent claim of claim 23.

The following is an examiner's statement of reasons for allowance: Upon reconsideration in view of applicant's argument including the argument filed after Final Rejection of the parent case and especially in view of reconsideration of pages 6-8 of applicant's specification which specifically enumerates the various parameters of the optimal wash sequence it has been concluded that the Iijima reference does not render obvious the claimed invention for the reason that in Iijima the wash sequence varies only in response to the manual selection of one of two positions of a manual switch. The wash sequence is always the same as long as the position of the manual switch is not changed. In the presently claimed method a plurality of parameters, as described on pages 6-8 of the specification are sensed and may influence the washing process. The prior art does not teach establishing an optimal wash sequence for each selected cylinder based on a plurality of parameters as taught and claimed by applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Nguyen whose telephone number is (703) 308-2869. The examiner can normally be reached daily from 9 AM to 5PM. If attempts to reach the examiner
